

Palmerston North and Ashhurst network – changes to streets

The new bus network coming to Palmerston North and Ashhurst from February 2024 will see buses no longer go down some streets and begin going down others. This is a result of the new network having routes focused on being more direct. The frequency will also increase, making transfers between services easier. Places where buses are being moved from will generally be within about 500 metres of a new stop.

The following tables detail streets which will be new to buses, and those which will no longer have buses, from February 2024.

Will be new to buses

Street name	Section
Albert St	Grey St – Ferguson St
