

# ENSURING A SAFE STAY

## FLOOD WARNINGS

Automated flood warning systems have been installed at both the Kahikatea and Kererū Campgrounds. These systems are designed to let you know when river levels are rising in plenty of time to pack up and evacuate the valley. Should the flood sirens go off during your visit, please remain calm, ensure others are aware of the potential danger, and evacuate the Reserve. Authorities will be out shortly after the sirens sound to check and clear the area.

A radar on the bridge at Piripiri takes continuous measurements of the Pohangina River's height. At two metres it transmits a signal back to the Kahikatea Camp warning system. The Kererū Camp system is set to activate once this height reaches three metres. The difference in activation levels is due to different levels of flood protection.

## SWIMMING

Rivers are changeable, unpredictable and can contain hidden dangers. The Pohangina River has changed over the years resulting in some strong currents and drops off suddenly, so caution is recommended, and children should be supervised at all times. It is also recommended that you do not swim until at least three days after heavy or prolonged rainfall or if the water doesn't look clean and clear. For water quality information you can visit [www.lawa.org.nz](http://www.lawa.org.nz).

## NOT PERMITTED IN THE RESERVE

- No hunting and shooting
- No motorbikes /quad bikes
- No dogs - this is to protect them from ingesting any bait that may be found within the Reserve. The bait is used to help preserve our native flora and fauna from pest damage.
- No fires - to help ensure the safety of yourself and other campers, please do not light fires except in the fire pit provided. Electric barbeques are provided at both the Kahikatea and Kererū Campgrounds for your use.

## NOISE

As a courtesy to other campers, please keep all noise to a minimum after 10pm.

## WELCOME TO TŌTARA RESERVE REGIONAL PARK

Tōtara Reserve Regional Park is one of the best and most accessible examples of native lowland forest that once covered much of the Horizons Region. Nestled in the Pohangina Valley, just 40 minutes drive from Palmerston North and 35km from Feilding, it's the ideal spot for a picnic or a longer stay. Horizons Regional Council manage the Reserve, with pest plant and animal control work programmes in place to protect and enhance the native biodiversity.

Tōtara, mataī, rimu, and kahikatea are common within Tōtara Reserve. There are also black beech trees and several species of tree ferns. The Reserve is home to many native birds including tūī, ruru, kārearea (NZ falcon), korimako (bellbird), kererū, miromiro (tomtit), and pōpokatea (whitehead).
