Dear Robyn

Copy of an Environmental Management Plan

During our presentation at the Land Chapter hearing on Thursday 17 July 2008, Clr Jill White requested a copy of an operative Environmental Management Plan for the Committee's reference.

It was also noted that Commissioner Rob van Voorthuysen was keen to see what the Wellington Region Erosion and Sediment Control Guidelines look like.

For the Committee's reference I provide a copy of the following documents:

- 1 Environmental Management Plan for Project West Wind (EMP)
- 2 Supplementary Environmental Management Plan for a stage of works at Project West Wind. (SEMP)
- 3 Erosion and Sediment Control Guidelines for the Wellington Region.

It is important to clarify that the EMP is an overarching document that sets the high level controls for a development such as West Wind. The detailed controls for erosion and sediment control are provided in the SEMP. For project West Wind there are thirteen SEMP's for various parts of the site, the SEMP provided gives an example of the level of detail that we provide for effective erosion and sediment control.

I trust this information will prove beneficial for the Committee. If the Committee require any further information of this nature please feel free to contact me.

Yours sincerely

Ewen Robertson
