RUAPEHU DISTRICT COUNCIL	151	15	[States in submission that a number of rules in part II of the Plan make reference to particular codes, standards or guidelines and gives the following Provisions as examples: Rule 13-2; Rule 13-11; Rule 13-19; Rule 15-4; Rule 16-4] (a) Redraft the above provisions in compliance with Part 3 of the First Schedule to the RMA. (b) Amendment to relevant provisions to ensure that the use of codes of practice, standards or guidelines as elements of rule compliance are lawful, enforceable and certain in terms of both interpretation and application, or otherwise remove them from the Plan (Part II).	Accept in part
	X 481	80	PALMERSTON NORTH CITY COUNCIL - Support	Accept in part
	X 531	7	HORTICULTURE NEW ZEALAND - Support in part	Accept in part
RUAPEHU DISTRICT COUNCIL	151	9	(a) The following general" submissions highlight the areas in need of redrafting, replacement or removal in order to make the One Plan understandable and functional. (b) The One Plan maps must provide more definitive and useable information as necessary. In particular, the maps for "Floodable Area Maps", "Highly Erodible Land" and "Significant Landscapes" are not adequate and need to be enlarged to give the necessary detail. New Maps should be issued or there should be access to the GIS tool to view data at a farm and community level. Data at a Regional level is not adequate. (c) The inadequacy of the Maps in the One Plan makes submitting in any meaningful manner difficult and renders the consultation process flawed. More detailed plans must be provided and the consultation period extended to give concerned submitters an opportunity to make assessments on the economic, social, cultural and environmental impacts of the One Plan. SHARN HAINSWORTH	116	24	I submit that the approach taken by Horizons Regional Council is to try to address these issues (sustainable development) alone within the framework of the One Plan. I submit that this approach is entirely insufficient and may lead to poorly controlled/encouraged development/resettlement. I submit that a forum containing developers, surveyors, engineers, soil experts, territorial local authorities and Horizons Regional Council needs to be required to through the Regional Policy Statement (RPS) of the One Plan. The role of this forum would be to ensure continual dialogue between different parts of the industry as time moves forward, climate change impacts more and population density steadily increases.	Reject
SHARN HAINSWORTH	116	25	I also submit that the RPS of the One Plan should require Territorial Local Authorities to form long term (50-100 year) development strategies for development in conjunction with the above mentioned (submission point 116/24) forums.	Reject

MINISTRY OF ECONOMIC DEVELOPMENT	243	1	<p>Either The addition of a separate chapter to "PART 1: The Regional Policy Statement Our Regions Significant Issues" to ensure that extraction of the regions mineral resources is recognised and provided for as an important driver of regional economic development and a key factor in building community wellbeing. The Manawatu-Wanganui region is an important mineral producing region in New Zealand, and the proposal must recognise the value of the use and development of those mineral resources in providing for social and economic wellbeing at regional and national scales. A suggested policy framework for minerals is as follows:</p> <p>Issue 1 (As a significant resource management issue to address)</p> <p>Responsible and efficient utilisation of the regions mineral resources, which contribute at regional or national levels to peoples and communities wellbeing, may be compromised through land uses or developments above or in close proximity to mineral deposits or by unnecessary plan provisions.</p> <p>Issue 2</p> <p>Adverse effects of the use and development of mineral resources on other natural and physical resources.</p> <p>Objectives:</p> <p>Objective 1</p>	Accept in part

Develop policies, rules and other means as necessary to allow responsible and efficient utilisation of the regions mineral resources, and to ensure integrated management of the effects of mineral use and development.</p> <p>2.Consider provisions in district plans controlling land use and subdivision activities in areas adjacent to significant extraction sites. Where there are mining/quarrying activities, to require assessments and consideration of reverse sensitivity effects in determining resource consent applications for other sensitive uses, or plan changes.</p> <p>3.To compile and provide access to information on the value and distribution of the regions mineral resources to enable local authorities and interested persons to make informed resource management decisions.</p> <p>4.At district plan level, consider establishing mineral resource protection areas (being a buffer area around an extraction site or quarry to restrict the establishment of land uses which would be sensitive to the mining activity).</p>
