Hi Chris

Thank you for your email, which came through to me yesterday afternoon.

I am a project manager within Meridian's Renewable Development Team, and, yes we have been reassessing the potential for a wind farm at Mt Munro. We are currently drafting reports and assessments as part of a consenting process.

Over the past few days, we have begun reaching out to the neighbours to the project, to set up individual meetings to inform them of our plans, to share information, and to answer any questions. We are up in the area now, and for most of this week knocking on doors, trying to catch up with as many neighbours as possible. It would be great if we could catch up with you if you are available. If so, is there a particular day or time that would suit? Alternatively we'll likely be back again next week.

We also plan to hold a community information day on December 13th, to talk with the wider community.

Please feel free to reach out by email or mobile, if you'd like to meet, or have any questions.

Kind regards

Nick Bowmar

November 25, 2022

I have been advised that your company is relitigating (the last time was a few years ago) the possibility of installing wind turbines at Mt Munro Eketahuna and have approached some selected local individuals regarding this. I am a relatively new resident at Hastwell Eketahuna (2 1/2 years), however last time this happened I understand there was a great deal of distress and anger in the community. Could you confirm if you are seeking/about to seek consents for the wind farm and if this is the case, will you be consulting with locals through holding a public

meeting?

Many thanks

Chris Clarke
