Dear Jasmine

**Whanganui Prison Stormwater Discharge Application, Response to Further Information Request - Water Quality Sampling Results**

This is further to my letter of 18 June 2020. In that letter I had advised in response to your question 2, that stormwater quality results from a rain event on 24<sup>th</sup> May 2020 were still being analysed. That work has now been completed by Tonkin + Taylor and is attached to this letter as a spreadsheet. The spreadsheet has separate result tabs for mean concentrations, weighted concentrations, treatment and dilution analysis and rainfall.

I also attach a memo by Tonkin + Taylor (dated 6<sup>th</sup> July 2020) which explains the sampling and analysis methodology.

Yours sincerely

**Peter Hall** BPlan, MNZPI
