

Chris Teo-Sherrell

Hello. I'm standing in this by-election because we need a strong Regional Council that will increase its efforts to clean up our rivers, protect our natural resources and people, and be accountable.

I have the experience, skills and commitment including: 9 years on City Council so I understand local government; member of various national executives concerned with transport safety and sustainability; Ph.D. in ecology and agriculture so I understand the science Horizons uses; leadership of the Water Protection Society working at the front line protecting rivers; decades of grassroots involvement in community and environmental advocacy; rural background helping me to understand the issues; an open and questioning mind. And I walk the talk.

If elected, I'll work with others, rural and urban, community and officials, to clean up our rivers, prevent erosion, make transport safe and sustainable, promote sensible economic development, maintain flood protection and hold Council accountable.
