

Ross Barber

My policies and views include strengthening democratic principles in the Local Authority is a must, as lawlessness, corruption in the Regional Council is beyond comprehension, your health, wealth is being sold.

1080 poisoning is threatening our environment, shellfish and invertebrates,

the cartel with DOC giving resource consents is violating science.

Recognizing the effects of ignorance, an unwillingness for accountability to outcomes on environmental sustainability is paramount, otherwise the future of our children is rather bleak. We need resilient processes for attaining, environmentally healthy outcomes using scientific models that are transparent and honest

Managing population growth, increased awareness of health, pure natural foods, being able to capitalize on exports.

Projects

Form a unitary authority, addressing duplicitous electoral fraud.

Stop sociopathological people outside Palmerston North constituency perjuring courts and putting innocent people in jail.

Reinstate Voluntary pioneering Christian families and science

Return municipal assets

Open the gorge
