11 Introduction to **Rules Regional Plan**¹

11.1 Introduction to Part II

As described at the outset, the One Plan comprises two parts.

Part I is the *Regional Policy Statement*[^] under the ~~Resource Management Act 1991~~ (RMA) for the ~~Manawatu-Wanganui~~ Region (Chapters 1 to 10). It describes the significant resource management issues facing the Region and sets out the objectives, policies and methods for addressing those issues. Part I presents the overarching resource management framework for the Region.

Part II is the *Regional Plan*[^] under the RMA for the ~~Manawatu-Wanganui~~ Region (Chapters 11 to 18). It includes the *Regional Coastal Plan*[^] (Chapter 17). The primary focus of Part II is on *regional rules*[^] prescribing how activities controlled by the Regional Council under the RMA are regulated. Part II also contains policies designed to guide decision-making on *resource consent*[^] applications.

The contents of Part II are as follows:

- **Chapter 11** (this chapter) provides a users' guide to the *regional rules*, describing how activities can be regulated under the RMA and explaining the tables used for presenting the *rules*[^] in this Plan. Chapter 11 also provides a summary table of all the *rules*[^]. This summary (in Section 11.3) is a useful starting point for anyone wishing to find the *rule*[^] or *rules*[^] for a particular activity. It also contains the general objectives and policies for the Plan.
- **Chapters 12 to 17** set out the *rules*[^] for:
 - ~~L~~*and*[^]-use activities (Chapter 12)
 - ~~D~~*ischarges*[^] to *land*[^] and *water*[^] (Chapter 13)

¹ Officer's report – Setting the Scene, Administration, Introduction to Rules and Financial Contributions - Recommendation

- [Discharges](#) to air (Chapter 14)
- takes, uses and diversions of [water](#), and [bores](#)* (Chapter 15)
- the [beds](#) of [rivers](#), [lakes](#) and artificial watercourses, and damming (Chapter 16)
- activities in the [coastal marine area](#) (Chapter 17).

The [rules](#) in each of these chapters are supported by policies setting out decision-making criteria or matters to be considered during [resource consent](#) processes.

- Finally, **Chapter 18** sets out provisions for financial contributions.

11.1.1 Users' Guide to [Rules](#)

Chapters 12 to 17 of this Plan contain [rules](#) that allow, regulate or prohibit resource-use activities. This users' guide provides an explanation of the classification of activities under the RMA and a guide to understanding how the [rules](#) are set out in the [rule](#) tables.

11.1.2 Activity Classifications

The various types of activities are described in s77B RMA and, in the case of [restricted coastal activities](#), s2 of the [Resource Management Act RMA](#). The information below is intended to provide a summary of the Act as it relates to [rules](#) in a [regional plan](#).

- (a) If an activity is described as a **permitted activity**, it can be carried out without a [resource consent](#) provided it complies with the [conditions](#), standards or terms, if any, specified in the [rule](#).
- (b) If an activity is described as a **controlled activity**, a [resource consent](#) is required but the Regional Council must grant the consent if the [conditions](#), standards and terms, if any, in the [rule](#) are met. However, the Regional Council may impose [conditions](#) on the consent relating to matters specified in the [rule](#) over which control is reserved.
- (c) If an activity is described as a **restricted discretionary activity**, a [resource consent](#) is required and the Regional Council will decide whether or not to grant the consent. However, the Regional Council's powers to decline a [resource consent](#) or to impose consent [conditions](#) are restricted to the matters specified in the [rule](#) over which discretion is restricted.
- (d) If an activity is described as a **discretionary activity**, a [resource consent](#) is required and the Regional Council will decide whether or not to grant the consent. This decision will depend upon how consistent the proposed activity is with provisions of the RMA and the objectives and policies set out in this Plan.
- (e) If an activity is described as a **non-complying activity**, a [resource consent](#) is required. Consent can only be granted if the Regional Council is satisfied that either the adverse [effects](#) on the [environment](#) will be minor, or the activity will not be contrary to the objectives and policies of this Plan.
- (f) If an activity is described as a **prohibited activity**, the activity is not allowed under any circumstances.

- (g) If an activity in the *coastal marine area* is described as a **restricted coastal activity**, in addition to being classified as a discretionary or *non-complying activity*, the Minister of Conservation has required the activity to be so specified on the basis of its potentially significant or irreversible adverse *effects*. The Minister of Conservation is the *consent authority* for *restricted coastal activities*.

11.1.3 Guide to Rule Tables

The *rules* in this *Plan* are arranged in tables. Each table has **five six**² columns. After each table of *rules*, a “*rule* guide” **is may be**² included to explain how activities which are not included in the table, or which fail to comply with the provisions of a particular *rule*, are classified.

| <i>Rule</i> | Activity | Classification | Conditions/Standards/Terms | Control/Discretion, Non-Notification | Links ² |
|--|---|---|---|--|---|
| This column contains the <i>rule</i> number and <i>rule</i> title. | This column describes the activity or activities covered by the <i>rule</i> . | This column contains the classification of the activity - ie., permitted, controlled, restricted discretionary, discretionary, non-complying or prohibited. This column also identifies which activities are <i>restricted coastal activities</i> . | This column contains <i>conditions</i> , standards and terms for <i>permitted activity</i> , <i>controlled activity</i> and <i>restricted discretionary activities</i> . The conditions, standards and terms are ongoing requirements that must be met for as long as the activity is undertaken. Failure to comply with these conditions, standards and terms amounts to a breach of the <i>rule</i> . | This column is relevant only for <i>controlled activities</i> and <i>restricted discretionary activities</i> . For <i>controlled activities</i> , this column contains the matters over which the Regional Council has reserved its control. For <i>restricted discretionary activities</i> , it contains the matters to which the Regional Council has restricted the exercise of its discretion. Under s77D RMA, a <i>rule</i> for a <i>controlled activity</i> or a <i>restricted discretionary activity</i> may state whether consent applications may be decided without public notification or without service on affected <i>persons</i> . This column also includes any such statements about non-notification. The Regional Council is not obliged to make statements about non-notification: the Regional Council can simply choose to rely on the provisions of the RMA which describe when public notification is, or is not, required. | This column contains a cross-reference to the policies set out in each <i>rule</i> chapter. For <i>controlled activities</i>, <i>restricted discretionary activities</i>, <i>discretionary activities</i> and <i>non complying activities</i> the cross-reference shows the policy which will guide how decisions will be made on consent applications under each <i>rule</i>. For <i>permitted activities</i> and <i>prohibited activities</i> the cross-reference shows which policies the <i>rule</i> is implementing. |

~~11.2 General Objectives and Policies~~⁴

~~11.2.1 Scope and Background~~

~~Under the RMA most activities affecting air quality, water quality and quantity, the beds of rivers and lakes and the coastal marine area are restricted unless allowed by a rule or resource consent. Many such activities have only minor effects and requiring a resource consent in every case would be unduly bureaucratic and costly. By contrast, land-use activities are allowed under the Act unless restricted by a rule. Some land-use activities can have very significant effects which should not be allowed without restriction. Through rules the Regional Council can both free up as many minor activities as possible, thereby minimising costs on resource users, and restrict activities that might otherwise cause significant effects. This chapter describes the Regional Council's overarching objective and policies for regulating activities. It then sets out general rules that serve as a default for other rules in this Plan.~~⁵

~~11.2.2 Objective~~⁶

~~Objective 11-1: Resource management in the Manawatu-Wanganui Region~~

- ~~(a) The regulation of activities in a manner which maximises certainty and avoids unnecessary costs on resource users and other parties.~~
- ~~(b) The regulation of activities in a manner which gives effect to the provisions of Part I of this Plan, the Regional Policy Statement.~~⁷

~~11.2.3 Policies~~⁸

~~Policy 11-1: Regional rules for restricted activities~~

~~For activities that are restricted under Part III of the RMA, pursuant to Sections 12(1), 12(2), 13(1), 14(1), and 15(1), regional rules will be adopted which:~~

- ~~(a) classify as **permitted** those activities that either are unlikely to have more than minor adverse effects on the environment, or may have more than minor adverse effects but these effects are acceptable and do not require any site-specific regulation by way of resource consents~~
- ~~(b) classify as **controlled** those activities that can have more than minor adverse effects on the environment, but where the need for site-specific management can be confined to a narrow list of matters that can be addressed by way of consent conditions on a consent that must be granted~~

⁴ The 'General Objectives and Policies' heading has been incorporated in its entirety into Chapter 11A, section 11A

⁵ The Scope and Background has been incorporated in its entirety into Chapter 11A, section 11A.1

⁶ The 'objective' heading has been incorporated in its entirety into Chapter 11A, section 11A.2

⁷ Objective 11.1 has been incorporated in its entirety into Chapter 11A, Objective 11A.1

⁸ The 'Policy' heading has been incorporated in its entirety into Chapter 11A, Section 11A.3

- ~~(c) — classify as **restricted discretionary** those activities for which the Regional Council needs to retain its discretion to decline consent owing to the potentially significant level of adverse effects, but it is possible to restrict the exercise of the Regional Council's discretion to a specified list of matters~~
- ~~(d) — classify as **discretionary** those activities for which the Regional Council needs to retain its discretion to decline consent owing to the potentially significant level of adverse effects, and it is not practicable to restrict the exercise of the Regional Council's discretion to a specified list of matters~~
- ~~(e) — classify as **non-complying** those activities for which the Regional Council would generally not grant a resource consent owing to the potential for very significant adverse effects on the environment~~
- ~~(f) — classify as **prohibited** those activities for which there is clear evidence that the activity is likely to have adverse effects that are so significant that they could not be adequately avoided, remedied or mitigated under any circumstances~~
- ~~(g) — classify as a **restricted coastal activity** (in addition to being classified as discretionary or non-complying) those activities in the coastal marine area that are required to be so classified by the Minister of Conservation.⁹~~

Policy 11-2: Regional rules for unrestricted activities

~~For activities that are allowed under Part III of the RMA, pursuant to Sections 9(3), 12(3), 13(2), 14(2), and 15(2), the Regional Council will intervene by way of regional rules only where:~~

- ~~(a) — any such activity is likely to cause significant adverse effects on the environment, and~~
- ~~(b) — regional rules are the best means of addressing those adverse effects.~~

~~For any rules adopted for these activities, activities will be classified in the same manner as that set out under Policy 11-1.¹⁰~~

Policy 11-3: Conditions, standards and terms in regional rules

~~Regional rules will contain measurable and enforceable conditions, standards and terms so that there is certainty for both resource users and other interested parties.¹¹~~

Policy 11.4: Common catchment expiry or review date

~~Consent expiry dates will be set to the closest common catchment expiry or review date as outlined below in Table 11.2, unless any of the circumstances described in Policy 2.2 apply. The dates listed in Table 11.2 show the initial expiry or review date for all consents within the catchment. Future dates for expiry or review of consents within that catchment shall occur again every ten years thereafter.~~

¹⁰ Policy 11.2 has been incorporated in its entirety into Chapter 11A, Policy 11A.2

¹¹ Policy 11.3 has been incorporated in its entirety into Chapter 11A, Policy 11A.3

~~For a consent which has duration longer than ten years, review of the consent shall occur on the review date in Table 11.2 and every ten years thereafter until consent expiry. Extra review dates may be set in accordance with Policy 2.3.~~¹²
