Notes for track changes. This document shows relevant terms and any recommended changes from officers reports for the June 2009 hearing which covers the topics of Administration and Finance, Air, Hazards, Infrastructure, Energy and Waste, Landscapes and Natural Character and Management of Production Soils.

Any glossary terms which are not relevant to the above set of hearings (including changes recommended from previous hearings) are shown in Grey

- Recommendations made by the Air Officers Report are shown in Pink.
- Recommendations made by the Supplementary Air Officers Report are shown in Blue
- Recommendations made by the Infrastructure, Energy and Waste Officers Report are shown in Light Green.
- Recommendations made by the Addendum to the Infrastructure, Energy and Waste Officers Report are shown in Dark Green.
- Recommendations made by the Supplementary Infrastructure, Energy and Waste Officers Report are shown in Orange.
- Recommendations made by the Natural Hazards Officers Report are shown in Red
- Recommendations made by the Supplementary Natural Hazards Officers Report are shown in Purple
- Recommendations made as a result of the supplementary report proofing process are in Light Blue.

Words recommended to be added are shown in <u>underline</u>, words recommended to be removed are shown in <u>strike through</u>.

Terms defined within the plan glossary are *Italicised* and marked with a '\*' symbol. Terms defined in the Resource Management Act 1991 are *Italicised* and marked with a '^' symbol.

## **Glossary**

A term or expression that is defined in the Resource Management Act 1991 (RMA) and used in this Plan, but which is not included in this glossary, has the same meaning as in the Act RMA. Definitions provided in the RMA are not repeated in this glossary but are marked with the following symbol ^.

**Abrasive blasting** means the cleaning, smoothing, roughening, cutting or removing of part of the surface or any article by the use of a jet of sand, metal shot, grit or any other abrasive material propelled by a blast of compressed air or mechanically via a rotary wheel, impeller or other means.

**Abundant** For the purposes of Schedule E species are considered to be abundant when they contribute more than most other species to the composition of an area of interest, but are not the *dominant\** species. This is a measure of the contribution to an area of interest (e-g., the same habitat type or *forest\** tier) of a species in relation to other species in the same area, and is not simply a frequency count as both biomass and density of a given species are considered.<sup>1</sup>

**Agrichemical** means any substance, whether inorganic, human-made or naturally occurring, modified or in its original state, that is used to eradicate, modify or control flora and fauna. For the purposes of NZS 8409 it includes agricultural compounds.<sup>2</sup> For the purposes of this pPlan, agrichemicals\* do not include animal remedies, fertilisers\*, fumigants\*, or sanitisers.

Air Officer's report - (AIR32)

Biodiversity End of hearing report January 2009

**Ambient air** means air outside buildings or *structures* and does not in any way refer to indoor air or to air in a workplace.

Animal effluent means faeces and urine from animals other than humans.

Archaeological site — Any place in New Zealand that either —

(a) (i) Was associated with human activity that occurred before 1900; or

(ii) Is the site of the wreck of any vessel where that wreck occurred before 1900; and

(b) Is or may be able through investigation by archaeological methods to provide evidence relating to the history of New Zealand 3 4

Association For the purposes of Schedule E means a species, or group of species, landform or soil type occurring in space together. Associations can be observed in geographical pattern across the landscape, or in distinctive community groupings.<sup>1</sup>

At-risk habitat means an area defined as an at risk habitat in accordance with Schedule E.

- (a) an area of indigenous vegetation of a type identified in Table E1 as being atrisk, and which meets the criteria described in Table E2 for determining whether an area of indigenous vegetation constitutes a habitat for the purposes of this plan
- (b) any vegetation (whether indigenous or not) within 20 metres of an area identified in Schedule D as being a site of significance aguatic
- (c) any vegetation (whether indigenous or not, and including No Threat category habitat types identified in Table E1) that contains, or could be reasonably known to contain, threatened plant and/or animal species as identified in Table E3. <sup>5</sup>

**Basel Convention** means the Convention of the Control of Transboundary Movements of Hazardous Wastes and Their Disposal, held at Basel on 22 March 1989.

**Biosolids** means a sewage or sewage sludge, derived from a sewage treatment plant, that does not include products derived from industrial wastewater treatment plants and that has been treated and/or stabilised to the extent that it is able to be safely and beneficially applied to <code>land</code>.

**Bore** means any hole, regardless of the method of formation, that has been constructed to provide access to the ground – eg., groundwater monitoring, extraction of groundwater or *waste*\* disposal.

**Broadleaved** For the purposes of Schedule E refers to woody tree and shrub species which flower, excluding the beech species. Common examples of species referred to as broadleaved include, but are not limited to, kamahi, titoki, fuchsia, maire, hinau, tawa, mahoe, and *Coprosma* species. The term 'broadleaf' is specific and refers to *Griselina littoralis* or *Griselina lucida*. <sup>1</sup>

**Buffer zone** refers to the use of *agrichemicals*\* and potentially odorous *discharges*^ and is the distance between the downwind edge of an area where the activity is undertaken and sensitive *land*^ uses.

Glossary-2

Proposed One Plan

Historic Heritage Officer's report - (HH 9), page 68

<sup>&</sup>lt;sup>4</sup> Historic Heritage Recommendations end of hearing report page 12 (s HH 19)

Biodiversity Officer's report - (BIO 35), page 144

**Canopy** For the purposes of Schedule E the canopy refers to the highest level of foliage within an area of habitat type excluding any emergent individuals. The height of the canopy layer will vary with the structure of the vegetation <sup>1</sup>

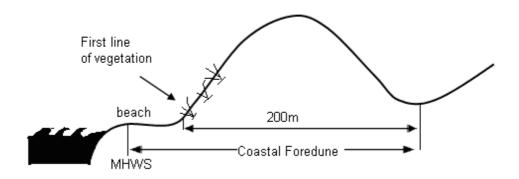

# **Chimney** means any *structure* or opening designed for venting the airborne products of combustion.

Cleanfill means a *landfill* that accepts only material that, when buried or placed, will not have an adverse *effect* on the *environment*. Cleanfill materials include virgin materials such as clay, soil and rock, and other inert materials such as concrete or brick that are free of:

- (a) combustible, putrescible (except that cleanfill may contain up to 5% by weight putrescible matter), degradable or leachable components
- (b) hazardous substances\*
- (c) products or materials derived from *hazardous waste*\* treatment, *hazardous waste*\* stabilisation or *hazardous waste*\* disposal practices
- (d) materials that may present a risk to human health
- (e) liquid waste\*.

Coastal foredune means a dune or ridge that is parallel to the shoreline of the ocean on the west coast, the strip of land and includes all land between the boundary of the coastal marine area and a line roughly parallel with the beach extending 200 metres inland of the first line of vegetation. [Chairperson's Minute #3 Point 56] 6

#### COASTAL FOREDUNE AREA

Coastal Highly Erodible Land means land mapped as Coastal Highly Erodible Land in Schedule A. Coastal Highly Erodible Land means land defined as Coastal Highly Erodible Land in Schedule A. 68

Coastal Erosion Management Area means the Coastal Erosion Management Area shown in Schedule A. [Chairperson's Minute #3 Point 16] 6

**Common** For the purposes of Schedule E species are considered to be common when they contribute more to the composition of an area of interest than species that are *scattered\** or *occasional\**, but less than species that are *abundant\** or

Land supplementary report - November 2008

6

dominant. This is a measure of the contribution to an area of interest (e-g., the same habitat type or forest\* tier) of a species in relation to other species in the same area, and is not simply a frequency count as both biomass and density of a given species are considered.

Common catchment expiry or review date means the date set in Part II (Regional Plan^) of the One Plan for all consents within a water management zone\* to be reviewed or to expire.

Composting refers to the biological treatment or decomposition of organic material under controlled conditions to produce a stabilised product which is potentially beneficial to plant growth.

#### Contaminated land means land which:

- if there is an applicable national environmental standard on contaminants in soil, is more contaminated than the standard allows
- if there is no applicable national environmental standard on contaminants in soil, has a hazardous substance\* in or on it that:
  - (i) has significant adverse effects on the environment, or
  - (ii) is reasonably likely to have significant adverse effects on the environment.<sup>7</sup>

Continuous For the purposes of Schedule E means that an area of habitat type has no interruption of continuity or conspicuous gaps, allowing for small, infrequent canopy\* gaps (eg., tree fall gaps).

**Critical infrastructure** means *infrastructure* necessary to provide services which, if interrupted, would have a serious effect on the people within the Region or a wider population, and which would require immediate reinstatement. Critical infrastructure\* includes infrastructure^ for:

- (a) electricity substations
- (b) the treatment and storage of water for public supply (excluding the distribution network)
- (c) the management of human sewerage treatment (excluding the reticulation system)
- (d) strategic road and rail networks (as defined in the Regional Land Transport Strategy)
- (e) health care institutions including hospitals.

**Cropping** refers to properties greater than 4 ha mainly engaged in growing cereal, coarse grains, oilseed, peanuts, lupins, dry field peas or dry field beans. This does not include occasional use of land for these crops or growing of fodder crops which are to be used on the property\*.

Cultivation means the preparation of land for the purpose of growing annual crops or establishing pasture and any land disturbance\* associated with the planting, tending and harvesting of those crops.

Cultivation means the disturbance of soil in preparation for the planting of seeds It includes ploughing, discing, hoeing, ripping, turning and lifting.

Glossary-4 Proposed One Plan

Infrastructure, Energy and Waste Officer's report - (IEW 34), page 262

Land Officers report - (LAND 38), page 337

excludes *production forestry*\* activities, harrowing, direct drilling of seed and notillage practices. <sup>6</sup>

Cushionfield For the purposes of Schedule E means an area of vegetation in which the cover of cushion-plants in the *canopy\** is 20-100% and in which the cushion-plant cover exceeds that of any other growth form or bare ground. Cushion plants include *herbaceous\**, semi-woody and woody plants with short densely packed branches and closely spaced leaves that together form dense hemispherical cushions. The growth form occurs in all species of *Donatia*, *Gaimardia*, *Hectorella*, *Oreobolus*, and *Phyllachne* as well as in some species of *Achiphylla*, *Celmisia*, *Centrolepis*, *Chionohebe*, *Colobanthus*, *Dracophyllum*, *Kelleria*, *Haastia*, *Leucogenes*, *Luzula*, *Myosotis*, *Poa*, *Raoulia*, and *Scleranthus*.

**Dairy farming** refers to properties greater than 4 ha and mainly engaged in the farming of dairy cattle.

dbh means diameter at breast height, measured as the diameter of a tree trunk at 1.4 m above the ground. 11

**Dead animal matter** means any substance derived from the tissue, bones or blood of animals or fish, whether processed or not.

<u>Discontinuous</u> For the purposes of Schedule E means that an area of habitat type is not *continuous*, has distinct interruptions, or conspicuous gaps, excluding those gaps created by tree fall.<sup>1</sup>

**Domestic wastewater** refers to wastewater generated on the *property\** from toilets, urinals, kitchens, bathrooms, showers, baths, basins, water closets and laundries. Includes such wastewater flows from facilities serving staff/employees/residents in institutional, commercial and industrial establishments and small schools (under 2,000 l/d), but excludes commercial and industrial *wastes\**, large-scale laundry activities and any stormwater flows.

**Dominant** For the purposes of Schedule E species are considered to be dominant (or to dominate) when they contribute more than any other species to the composition of an area of interest. Dominant species can be considered the most characteristic species of the area of interest or habitat type. This is a measure of the contribution to an area of interest of a species in relation to other species in the same area, and is not simply a frequency count as both biomass and density of a given species are considered.<sup>1</sup>

<u>Duneland</u> For the purposes of Schedule E means areas where the landform is characterised by sand dunes (active or stable).<sup>1</sup>

**Endemic** refers to a species that is indigenous only to a certain area – eg., the Manawatu-Wanganui a Region of New Zealand.

Energy efficiency means a change to energy use that results in an increase in the net benefits per unit of energy<sup>9</sup>

Environmental Management System means a document that includes, but is not limited to, organisational structure, responsibilities of staff and management, practices, procedures, processes and resources for developing, implementing, achieving, reviewing and maintaining the organisation's methods for managing adverse environmental effects of its activities.

Supplementary Infrastructure, Energy and Waste Officers Report – Recommendation IEW\_ADD 2

0

Erosion and Sediment Control Plan means a plan developed in accordance with the Erosion and Sediment Control Guidelines for the Wellington Region, 2002 (which shall be read as if the Guidelines apply to the Manawatu-Wanganui Regional Council). The plan shall prescribe how the nine principles of erosion and sediment control described in Section 3 of the Guidelines shall be addressed for the a land disturbance\* activity. [Chairperson's Minute #3 Point 48] 6

**Fernland** For the purposes of Schedule E means an area of vegetation in which the cover of ferns in the *canopy*\* is 20-100% and in which the fern cover exceeds the cover of any other growth form or bare ground. Tree ferns  $\geq$  10 cm diameter at breast height (*dbh*\*) are excluded from this definition of fernland and considered to be trees.

**Fertiliser** means any substance or mix of substances that is described as or held to be suitable for sustaining or increasing the growth, productivity or quality of plants (or animals indirectly) through the application to plants and soils of:

- (a) the following major nutrients: nitrogen, phosphorus, potassium, sulphur, magnesium, calcium, chloride and sodium
- (b) the following minor nutrients: manganese, iron, zinc, copper, boron, cobalt, molybdenum, iodine and selenium
- (c) non-nutrient attributes of the materials used in fertiliser
- (d) fertiliser additives

but does not include biosolids\* or dead animal matter\*.

Fire Training: For the purpose of defining the term fire training\* as it appears in Rule 14-5 fire training shall be undertaken by:

- (a) the New Zealand Fire Service (or under authority of), or
- (b) any Rural Fire Authority (or under authority of); or
- (c) <u>a New Zealand Qualification Authority registered provider accredited for</u> fire training.
- (d) The New Zealand Defence Force Fire Service (or under the authority of), including the School of Military Engineering.<sup>10</sup>

**Flaxland** For the purposes of Schedule E means a subclass of *tussockland\** where species of *Phormium* are *dominant\**.

**Floodway** means an artificial flood control waterway which diverts part of the *river's* flow from the *river* during flood periods and which is identified by the maps in Schedule I.

Forest For the purposes of Schedule E means an area of woody vegetation\* in which the canopy\* cover of trees and shrubs is more than 80% and in which tree cover exceeds shrub cover. For the purpose of this definition, \*\*Trees are woody plants with a diameter at breast height (dbh\*) of more than 10 centimetres. And t Tree ferns with a dbh\* of more than 10 cm are treated considered to be as trees.

**Fumigant** means a substance used to eradicate, modify or control flora or fauna within an enclosed area or premises.

**Grade Aa biosolids** means *biosolids* which meet the criteria for a grade Aa biosolids specified in the Guidelines for the Safe Application of Biosolids to Land in

Glossary-6

Proposed One Plan

Officer's Supplementary report – Air – Recommendation AIR 32A

Biodiversity Officers report - (BIO 31), page 129

New Zealand, August 2003 (Ministry for the Environment and New Zealand Water and Waste Association).

**Grassland** For the purposes of Schedule E means an area of means vegetation in which the cover of grass in the  $canopy^*$  is 20-100% and in which grass cover exceeds the cover of any other growth form or bare ground. Tussock grasses are excluded from the grass growth form  $^{11}$   $^{1}$ 

#### Green waste means organic material including:

- (a) vegetative material, but not tree trunks or limbs larger than 100 mm
- (b) vegetable peelings or trimmings, but no other kitchen wastes
- (c) soil attached to plant roots that may be physically modified but is otherwise in its natural state 12

but not including animal products (eg., manure, feathers, carcasses) other than as an occasional or incidental input.

**Gully** means a landform created by running  $water^{\wedge}$  eroding a hillside with the appearance of a deep ditch through to a small valley.

**Halogenated** in relation to hydrocarbons means hydrocarbons with fluorine, bromine, iodine or chlorine attached.

**Hand-held appliance**, for the purposes of the *rules* regulating the *discharge* of *agrichemicals*, refers to a knapsack sprayer, a non-motorised handgun sprayer or a sprayer with a rate and volume of application no greater than these devices.

**Hazardous substance** means, unless expressly provided otherwise by regulations prepared under the Hazardous Substances and New Organisms Act 1996, or the Resource Management Act 1991 RMA, any substance:

- (a) with one or more of the following intrinsic properties:
  - (i) explosiveness
  - (ii) flammability
  - (iii) a capacity to oxidize
  - (iv) corrosiveness
  - (v) toxicity (including chronic toxicity)
  - (vi) ecotoxicity, with or without bioaccumulation, and
- (b) which on contact with air or *water* (other than air or *water* where the temperature or pressure has been artificially increased or decreased) generates a substance with any one or more of the properties specified in paragraph (a) of this definition.

#### Hazardous waste means waste that:

- (a) belongs to one or more categories in Annex I of the Basel Convention\*, and
- (b) has one or more of the characteristics in Annex III of the Basel Convention\*.

<sup>&</sup>lt;sup>12</sup> Air Officer's report - (AIR44)

-

**Health care institution** has the same meaning as in section 2(1) of the Health and Disability Commissioner Act 1994.

**Heathland** For the purposes of Schedule E means an area of vegetation dominated\* by species that are slow-growing, stunted, with small, hard, scale-like or needle-like leaves with a thick waxy cuticle, and foliage that is flammable, resistant to decay, and produces acid litter. *Heathland\** which occurs on wet substrates (e.g., pakihi) comprises a mixture of *shrubland\** or *treeland\** with rush-like species, wire rush and ferns.<sup>1</sup>

**Herbaceous** refers to plant species that do not form woody tissue. *Herbaceous* species can be annual or perennial.

**Herbfield** For the purposes of Schedule E means an area of means vegetation in which the cover of herbs in the *canopy* is 20-100% and in which the herb cover exceeds the cover of any other growth form or bare ground. Herbs include all herbaceous species. <sup>11 1</sup>

**High temperature hazardous waste incinerator** means an incinerator that is designed and operated principally for burning *hazardous waste*\* at a temperature greater than 850°C as measured:

- (a) near the inner wall of the incinerator, or
- (b) at another point in the combustion chamber where the temperature is likely to represent the temperature in the incinerator.

Highly Erodible Land (HEL) means land mapped as highly erodible land in Schedule A and includes both coastal highly erodible land and hillcountry highly erodible land. Highly Erodible Land\* (HEL) means land defined as highly erodible land in Schedule A and includes both coastal highly erodible land\* and hillcountry highly erodible land\*.

Hillcountry Highly Erodible Land/ means land/ mapped as hillcountry highly erodible land/ in Schedule A.Hillcountry Highly Erodible Land/ means land/ defined as hillcountry highly erodible land/ in Schedule A. 8 6

Hill Country Erosion Management Area means the Hill Country Erosion Management Area shown in Schedule A. [Chairperson's Minute #3 Point 16]<sup>6</sup>

#### Infrastructure (in section 30 of the RMA) means:

- (a) pipelines that distribute or transmit natural or manufactured gas, petroleum, or geothermal energy
- (b) a network for the purpose of telecommunication as defined in section 5 of the Telecommunications Act 2001
- (c) a network for the purpose of radiocommunication as defined in section 2(1) of the Radiocommunications Act 1989
- (d) facilities for the generation of electricity, lines used or intended to be used to convey electricity, and support structures for lines used or intended to be used to convey electricity, excluding facilities, lines, and support structures if a person:
  - (i) uses them in connection with the generation of electricity for the person's use, and
  - (ii) does not use them to generate any electricity for supply to any other person-

Glossary-8 Proposed One Plan

- (e) a water supply distribution system, including a system for irrigation
- (f) a drainage or sewerage system
- (g) structures for transport on land by cycleways, rail, roads, walkways or any other means
- (h) facilities for the loading or unloading of cargo or passengers transported on land by any means
- (i) an airport as defined in section 2 of the Airport Authorities Act 1966
- (j) a navigation installation as defined in section 2 of the Civil Aviation Act 1990
- (k) facilities for the loading or unloading of cargo or passengers carried by sea, including a port-related commercial undertaking as defined in section 2(1) of the Port Companies Act 1988
- (I) anything described as a network utility operation in regulations made for the purposes of the definition of 'network utility operator in section 166 of the RMA.

**Intensive sheep and beef farming** refers to *properties* greater than 4 ha mainly engaged in the farming of sheep and cattle, where the *land* grazed is irrigated.

**Interceptor system**, in relation to *discharges* of stormwater, means a facility designed into a stormwater management system with the purpose of:

- (a) preventing deliberate or accidental releases of any *hazardous substances*\* in the stormwater system, or
- (b) in the event of stormwater contamination by a hazardous substance<sup>⋆</sup>, reducing all such substances in the stormwater prior to discharge<sup>⋆</sup> to concentrations that will not result in contamination of either water<sup>⋆</sup> or sediments to such a degree that is likely to result in significant adverse effects<sup>⋆</sup> on aquatic life<sup>⋆</sup> or on the suitability of the water<sup>⋆</sup> for potable water supply.

Iwi management plan means a relevant planning document recognised by an iwi authority not and lodged with the regional ecouncil. 14

**Land disturbance** means the disturbance of the land surfaces surface by any means including blading, blasting, contouring, cutting or filling of batters, excavation, ripping, root raking, or otherwise moving or removing soil or earth. This definition excludes normal maintenance or legally established structures, roads, tracks and railway lines. [Chairperson's Minute #3 Points 31, 56] 6

**Landfill** means a site where *waste*\*\_ is disposed of by burying it, or placing it upon *land*\*\textsuperpoonup or other waste\*.

Land use capability class (LUC) means a classification of a parcel of <code>land^\underloom</code>

Te Ao Maori Supplementary report - (TAM S26)

\_

Infrastructure, Energy and Waste Officer's report - (IEW 36), page 262

<u>Lichenfield</u> For the purposes of Schedule E means an area of vegetation in which the cover of lichens in the *canopy*\* is 20-100% and in which the lichen cover exceeds the cover of any other growth form or bare ground.<sup>1</sup>

**Light fuel oil** means petroleum distillate fuel that is used in liquid fuel-burning equipment and does not require preheating.

Maintenance and repair, in relation to structures , means to keep or restore a structure to good condition and includes the reconstruction or alteration of part of a structure , all activities associated with keeping a structure in good condition, or restoring a structure to good condition, provided that the activity:

- (a) The maintenance Ddoes not result in any increase in the base area of the structure ; and
- (b) The activity Ddoes not change the character, scale or intensity of any effects of the structure on the environment (except to reduce any adverse effects or increase any positive effects).

Activities covered by this definition include:

- (c) The reconstruction, alteration, removal or demolition of part of a structure :
- (d) <u>Ttrimming and removal of vegetation for the purpose of maintaining the functional integrity of a structure</u>
- (e) The erection and removal of temporary structures
- (f) The maintenance of access to structures.

This definition includes the maintenance of tracks as if they were *structures*^.

[Chairperson's Minute #3 Point 34] 6

**MALF** means the one-day mean annual low flow calculated as the average of the lowest flow of the *river* for each year (1 July to 30 June) of record.

**Market gardening** refers to properties greater than 4 ha mainly engaged in growing vegetables for human consumption (except dry field peas or beans), tree nuts, citrus fruit or other fruit.

**Mauri** means essential life force or principle; a metaphysical quality inherent in all things, both animate and inanimate <sup>15</sup>

**Mossfield** For the purposes of Schedule E means an area of vegetation in which the cover of mosses in the *canopy*\* is 20-100% and in which the moss cover exceeds the cover of any other growth form or bare ground.<sup>1</sup>

**Multifuel heater** means a domestic heating appliance designed to burn more than one type of *solid fuel\**.

#### New Zealand Threat Classification System and Lists

Means the threat classification systems and threatened species described in any of the following documents:

de Lange, P.J., Norton, D.A., Heenan, P.B., Courtney, S.P., Molloy, B.P.J., Ogle, C.C., Rance, B.D., Johnson, P.N. & Hitchmough, R. 2004. Threatened and uncommon plants of New Zealand. *New Zealand Journal of Botany 42:* 45-76.

Hitchmough, R., Bull, L., Cromarty, P. (comps) 2007. New Zealand Threat Classification System Lists 2005. Science and Technical Publishing No. 236. Department of Conservation, Wellington.

Glossary-10 Proposed One Plan

<sup>&</sup>lt;sup>15</sup> Te Ao Maori End report - (TAM S27)

Molloy, J., Bell, B., Clout, M., de Lange, P., Gibbs, G., Given, D., Norton, D., Smith, N., & Stephens, T. 2002. *Classifying Species According to Threat of Extinction*. Biodiversity Recovery Unit, Department of Conservation, Wellington.

Townsend, A.J., de Lange, P.J., Duffy, C.A.J., Miskelly, C.M., Molloy, J., Norton, D.A. 2008. *New Zealand Threat Classification System manual*. Science & Technical Publishing. Department of Conservation. Wellington.<sup>1</sup>

Occasional For the purposes of Schedule E species are considered to be occasional\* when they contribute more than scattered\* species, but less than species which are common\*, abundant\* or dominant\* and can be expected to be encountered infrequently within the area of interest. This is a measure of the contribution to an area of interest (e.g., the same habitat type or forest\* tier) of a species in relation to other species in the same area, and is not simply a frequency count as both biomass and density of a given species are considered.<sup>1</sup>

Oil means petroleum in any form other than gas and includes crude oil, fuel oil sludge, oil refuse and refined oil products (eg., diesel fuel, kerosene, light fuel and motor gasoline).

**Open burning** means the burning of materials other than in purpose-built fuel-burning equipment designed to control the combustion process. Open burning includes burning in drums and backyard rubbish incinerators.

Operation means operation of any structure^ or part of a structure^ defined as infrastructure^ 16

### Persistent organic pollutants (POP) are organic substances that:

- (a) demonstrate toxic properties
- (b) resist degradation
- (c) bioaccumulate
- (d) can undergo a long-range transfer in air and water<sup>∧</sup>
- (e) have a potential harmful *effect* on health or the *environment* including accumulating in living organisms and the food chain.

Examples include pesticides (such as DDT), industrial chemicals (such as polychlorinated biphenyls - PCBs) and unintentional by-products of industrial processes (such as dioxins and furans).

PM<sub>10</sub> means particulate matter that is:

- (a) less than 10 microns in aerodynamic diameter
- (b) measured in accordance with the United States Code of Federal Regulations, Title 40 Protection of Environment, Volume 2, Part 50, Appendix J Reference method for the determination of particulate matter as  $PM_{10^{\circ}}$  in the atmosphere.

Podocarp For the purposes of Schedule E means Southern hemisphere conifer species which have cones modified into fleshy berry-like structures but do not

.

 $<sup>^{\</sup>rm 16}$  Infrastructure, Energy and Waste Supplementary Officer's Report

have flowers. *Podocarp\** species include, but are not limited to, the totara species, matai, miro, kahikatea and rimu.<sup>1</sup>

**Primary allocation take** means, in relation to the taking of *water* from a *river*, a take granted consent in accordance with Policies 6-2, 6-3 or 6-4, or any preceding primary *water* allocation regime.

**Production forestry** means a *forest* of selected species of trees that are specifically planted, managed and harvested for the production of timber or other wood-based products, and includes understorey that has established beneath the *canopy* and areas that are demonstrated to be failed plantings from the previous rotation.

Property refers to ene or more an allotments as contained in a single certificate of title, and includes all adjacent land allotments that is are in the same ownership. A legal road is considered a property for the purposes of this Plan. 17

**Public land** means *land* to which the public has free access at the time that an activity is undertaken.

**Public water supply** means a reticulated publicly or privately owned drinking water supply connecting at least two buildings on separate titles and serving at least 1,500 person days per year (ie., 25 people for at least 60 days per year). Drinking water is water intended to be used for human consumption, food preparation, utensil washing, oral hygiene or personal hygiene.

Rare habitat means an area defined as *rare habitat*\* in accordance with Schedule E.<sup>1</sup>

Rare and threatened habitat means an area defined as rare and threatened habitat in accordance with Schedule E. of indigenous vegetation of a type identified in Table E1 as being rare or threatened respectively, and which meets the criteria described in Table E2 for determining whether an area of indigenous vegetation constitutes a habitat for the purposes of this Plan 18

**Reasonable mixing**, in relation to the *discharge* of *contaminants* into surface *water*, means either:

- (a) a distance downstream of the *discharge* that is the least of:
  - (i) the distance that equals seven times the width of the *river* at the point of *discharge* when the flow is at half the median flow, or
  - (ii) 200 metres from the point of discharge on, for discharge to artificial watercourses including farm drainage canals, 200 metres from the point of discharge or the property boundary, whichever is the greater, or
  - (iii) the point at which mixing of the particular contaminant concerned has occurred across the full width of the body of water in the river, or
- (b) a distance for *reasonable mixing*\* determined as appropriate for a consent application where special circumstances apply.

one plan

Glossary-12

Overall Plan Officer's report - (OVR 06), page 75

Biodiversity Officer's report - (BIO 32), page 131

in relation to the discharge of contaminants into coastal water, means a distance for reasonable mixing determined as appropriate for a consent application. 19

Repair (see "Maintenance and repair\*") 6

Review date (see "Common catchment expiry\*")

River/coast interface boundary is the line created by joining the lines of MHWS at the open coast either side of the interface between the *river* or stream and the open coast.<sup>20</sup>

Residual inundation means innundation that will result if any one or both of the following occurs:

- (a) <u>a total or partial failure of the flood avoidance or mitigation measures</u> occurs during a 0.5% annual exceedence probability (AEP) flood event.
- (b) a 0.2% annual exceedence probability flood (AEP) event occurs, the calculation of which accounts for *climate change*\* to the year 2090. 21 22

Rua koiwi means places where skeletal remains are kept<sup>15</sup>

**Rushland** refers to For the purposes of Schedule E means an area of vegetation in which the cover of rushes in the *canopy*\* is 20-100% and in which the rush cover exceeds the cover of any other growth form or bare ground. Included in the rush growth form are Rush species include, but are not limited to, some species of *Juncus*, *Apodasmia*, and all species of *Sporadanthus* and *Empodisma*. Tussock rushes are excluded from this definition of rushland.

**Scattered** For the purposes of Schedule E species are considered to be scattered when they contribute less than species which are *occasional\**, *common\**, *abundant\** or *dominant\** and can be expected to be encountered infrequently, and with a sparse distribution within the area of interest. This is a measure of the contribution to an area of interest (e.g., the same habitat type or *forest\** tier) of a species in relation to other species in the same area, and is not simply a frequency count as both biomass and density of a given species are considered.

**Scrub** For the purposes of Schedule E means an area of refers to woody vegetation. In which the cover of trees and shrubs in the canopy is greater than 80% and in which the shrub cover exceeds that of trees. Shrubs are woody plants less than 10 cm diameter at breast height. 11\_1

**Sea level rise** is the net rise in sea level relative to the *land* of the Region.

**Sedgeland** For the purposes of Schedule E means an area of vegetation in which the cover of sedges in the *canopy*\* is 20-100% and in which the sedge cover exceeds that of any other growth form or bare ground. Sedge species include, but are not limited to, many species of *Carex*, *Uncinia* and *Bolboschoenus*. Tussocksedges and reed forming sedges are excluded from this definition of *sedgeland*\*.1

**Shrubland** refers to For the purposes of Schedule E means an area of woody vegetation in which the cover of shrubs in the canopy is 20-80% and in which the shrub cover exceeds the cover of any other growth form or bare ground. 11 1

**Slope** is the angle from horizontal and is measured in degrees to an accuracy no less than that achieved by a hand-held inclinometer or abney level.

**Soil conditioner** means a substance, excluding any substance or mix of substances derived from animal tissue, bone or blood whether processed or not, that is added to a *fertiliser*, or applied to *land* by itself, that alters the physical/structural characteristics of the soil by:

- (a) altering the air or water retention capacity
- (b) encouraging floculation
- (c) discouraging compacting
- (d) increasing the biological activity of soil or
- (e) facilitating air circulation and drainage.

**Solid fuel** means a solid substance that releases useable energy when burnt (eg., wood and coal).

**Solid waste** means the combination of domestic, industrial and commercial waste and is also known as community waste.

**Spray drift** means the airborne movement of any sprayed *agrichemical*\* away from the target area.

**Supplementary water allocation take** means, in relation to the taking of *water* from a *river*, a take granted consent in accordance with Policy 6-5 or any preceding supplementary *water* allocation regime.

Taonga means all things prized or treasured, both tangible and intangible. 15

Threatened habitat means a habitat that since human settlement has been reduced to 20% or less of the likely land area covered by the habitat prior to human settlement. Threatened habitats\* are identified in accordance with Schedule E. 23-Threatened habitat means a habitat that is defined in Schedule E as a \*\*Tthreatened habitat\*.

**Treated timber** means timber treated with preservatives, including boron compounds (except TCMTB compounds), copper-chrome-arsenic, or creosote, but not including timber treated only with anti-sapstain compounds.

**Treeland** For the purposes of Schedule E means an area of refers to vegetation in which the cover of trees in the *canopy* is 20-80%, with tree cover exceeding the cover of any other growth form, and in which the trees form a *discontinuous* upper *canopy* above either a lower *canopy* of predominantly non-*woody vegetation* or bare ground. (Note: An area of vegetation consisting of trees above shrubs is classified excluded from this definition and is defined as either *forest\** or *scrub\** depending on the proportion of trees and shrubs in the *canopy\**). 11 1

**Tussockland** refers to For the purposes of Schedule E means an area of vegetation in which the cover of tussocks in the *canopy* is 20-100% and in which the tussock cover exceeds the cover of any other growth form or bare ground. Tussocks include all grasses, sedges, rushes and other *herbaceous* plants with linear leaves (or linear non-woody stems) that are densely clumped and are greater than 10 cm in height. Examples of the growth form occur in all species of This includes, but is not limited to, all species of *Cortaderia, Gahnia* and *Phormium* 

Glossary-14 Proposed One Plan

Biodiversity Officers report - (BIO 33), page 132

(see also Flaxland\*) and in some species of Chinochloa, Poa, Festuca, Rytidosperma, Cyperus, Carex, Uncinia, Juncus, Astelia, Aciphylla and Celmisia.

**Untreated wood** refers to any wood material or product, including sawdust, which is not treated with copper, chrome or arsenic ('CCA-treated' or 'tanalised'), or with any organochlorine preservative.

<u>Upgrade</u>, in relation to <u>structures</u>, means all activities associated with improving the function of a <u>structure</u> provided the activity:

- (a)  $\frac{1}{2}$  Ddoes not result in any increase in the base area of the *structure*, and
- (b) Deloes not change the character, scale or intensity of any effects of the structure on the environment (except to reduce any adverse effects or increase any positive effects).

Activities covered by this definition include:

- (c) The reconstruction, alteration, removal or demolition of part of a structure.
- (d) <u>Ttrimming and removal of vegetation for the purpose of improving the functional integrity of a structure</u>, and
- (e) ∓the erection and removal of temporary structures^.

This definition includes the *upgrade*\* of tracks as if they were *structures*^.

[Chairperson's Minute #3 Point 34]<sup>6</sup>

**Vegetation clearance** means the cutting, crushing, spraying, burning or other means of removal of vegetation, including indigenous and exotic plants. It does not include:

- (a) grazing
- (b) pruning or thinning operations associated with production forestry\*
- (c) the control of pest plants as defined in the Regional Pest Plant Management Strategy.
- (d) the control of other plants not included in the Regional Pest Plant Management Strategy where those plants are less than 2 years old and have established as a result of natural dispersion.
- (e) <u>vegetation clearance\* for the maintenance of infrastructur^\* of regional or national importance as defined in Policy 3-1(a).</u>
- (f) <u>vegetation clearance\* for the maintenance of existing formed public</u> <u>roads</u>^24 6

Waaāhi tapu means a place sacred to Maori in the traditional, spiritual, religious, ritual, or mythological sense 15

Waaāhi tupuna means ancestral places of significance (but not necessarily tapu) to a particular whanau, hapu or iwi. 15

Waste means substances or objects that are disposed of or intended to be disposed of.

Land Officers report - (LAND 10), page 111

2

**Wet abrasive blasting** refers to *abrasive blasting*\* when *water*\* or a mixture of abrasive and *water*\* is added to the airflow carrying the abrasive material prior to the blasting nozzle exit, or when the blasting medium is predominantly a pressurised slurry.

Water management zone means a water management zone as described in Schedule D.

**Woodburner** means a domestic heating appliance that burns wood, but does not include:

- (a) an open fire
- (b) a multi-fuel heater, a pellet heater, or a coal burning heater
- (c) a stove that is designed and used for cooking and is heated by burning wood.

Whole Farm Business Plan refers to a work plan or farm plan that has been prepared as part of the Sustainable Land Use Initiative (SLUI) and has been lodged with Horizons Regional Council and must contain information on:

- (a) any proposed future planting for erosion control
- (b) any proposed future tracking
- (c) any proposed future vegetation clearance\*
- (d) a programme or work plan for implementing required changes, and
- (e) monitoring and reporting requirements. 25 6

Woody vegetation means perennial vegetation that has hard lignified tissues.<sup>6</sup>
